

Keep me safe
to get me
there faster

Did you know that dangerous and prohibited goods cannot be sent in packages travelling through the international mail network?

These include explosives such as fireworks and gunpowder, aerosol spray cans and other compressed gasses, lighter fuels, perfumes, matches and other flammable products, and corrosives such as mercury. Counterfeit and pirated items are also forbidden.

Check before sending.

For more information, visit: www.upu.int/keepmesafe or contact your Post or Customs.

Keep me safe
to get me
there faster

Your Post is committed to providing quality service and delivering your packages and parcels as expeditiously as possible. But it can only do so with your help.

If you are sending a package abroad, be aware that some items, materials and substances are prohibited from travelling in the international mail stream.

Some products* are considered dangerous and present a safety hazard if travelling on aircraft. That's why international airline rules prohibit their inclusion in postal packages. These include ammunition, lighters, oil paints, perfumes, matches or mercury compounds, for example.

Other products, such as counterfeit or pirated goods, coins and valuable goods and live animals, are also prohibited from being sent through the post.

You are responsible for the content of packages you give to the Post for delivery. A package containing something it shouldn't be handled in accordance with the relevant national legislation and likely be destroyed. Failure to comply with prohibitions and restrictions will also affect your ability to claim compensation.

Refer to this flyer for information and contact your Post's customer service for advice and guidance.

www.upu.int/keepmesafe

* Conditions may differ if these items, materials or substances are travelling domestically only; check with your Post.

1 Dangerous goods prohibited in international mail

2 Lithium batteries

3 Prohibited items

Automobile components	Why? May contain flammable fuel additives, aerosols or compressed gas.	Mirror Seat cover
Medical devices	Why? May contain blood pressure measurement devices or thermometers that contain mercury.	Stethoscopes

Lithium batteries 2

- Want to send an electronic device containing lithium batteries or cells to someone in another country?
- Be sure to check that your Post accepts parcels or packages containing these batteries or cells.
- If your Post does accept such packages, the lithium batteries or cells must be installed in small consumer electronic equipment and cannot exceed a certain quantity.

not acceptable

(batteries exceeding allowable size/power limits)

- Electric bicycles
- Electric wheelchairs
- Small generators

uninstalled batteries

- Batteries not installed in handset
- Battery not installed
- Batteries shipped alone

Quick guide

- For international mail, the lithium batteries **MUST** be installed in the electronic equipment
- Packages must not carry more than four lithium cells or two batteries
- Lithium batteries alone or simply packed alongside the equipment are not acceptable for international mailing
- Strong outer packaging is required
- The contents of a parcel must be properly packaged to prevent shifting and/or damage to contents during transport
- Defective or damaged batteries are never acceptable

acceptable

(with batteries installed)

- | | |
|-----------------------|----------------------|
| GPS | Scanners |
| Smart phones | MP3 players |
| Video cameras | Portable DVD players |
| Electric shavers | Walkie-talkies |
| Bluetooth headsets | Digital cameras |
| Measuring equipment | Laptop computers |
| Radio-controlled toys | Tablet computers |

Prohibited items 3

The Post can transport a lot of things, but there are some items that are expressly prohibited in the international mail stream.

prohibited

- Narcotics and psychotropic substances, as defined by the International Narcotics Control Board, or other illicit drugs prohibited in the country of destination
- Obscene or immoral articles
- Counterfeit and pirated goods
- Articles which, by their nature or their packing, may expose officials or the general public to danger, or soil or damage other items, postal equipment or third-party property
- Live animals and reptiles*
- Coins, bank notes, currency notes or securities of any kind payable to bearer, travellers' cheques, platinum, gold or silver, precious stones, jewels or other valuable articles cannot travel in uninsured letter-post or parcel items*

acceptable

- Some live creatures, including bees, leeches and silkworms, can be sent, but the box or package carrying them must protect them, as well as postal staff and customers, from harm. Such items should be sent using a priority service and the package should be clearly marked URGENT - LIVING CREATURES - HANDLE WITH CARE. The sender's name and address must be clearly visible on the outer packaging.

As for money and valuables, some countries may still prohibit their entry on their territory even if they are sent as insured or registered letter-post or parcel items. So depending on where you are sending your items, always check with your Post for details and conditions.

Did you know?

- The transmission of counterfeit or pirated goods through the mail is illegal.
 - Counterfeit and pirated goods violate copyright provisions and constitute an economic crime.
- Furthermore, products like counterfeit medicines pose serious health risks to their users and taking them could possibly cause death.
- The Post works closely with customs authorities to prevent the transportation of counterfeit and pirated goods through the postal network.**
- ⚠ Packages containing counterfeit or pirated goods may be seized and destroyed.**

Packaging your items properly

Here are some general guidelines for making your parcel or package fit for travelling through international mail

general guidelines

- | | |
|---|---|
| Use padded envelopes for items with sharp edges or odd shapes to prevent the items cutting through the outer packaging. | Seal the parcel securely using strong tape along all the openings. |
| Use an outer carton strong enough to hold the weight of the contents. | Flatten any sharp ends of staples and cover with tape. |
| Mark the parcel FRAGILE OR PERISHABLE if applicable. | If you re-use cardboard boxes or any other container already used to transport items, please ensure that they have not been weakened as contents could get damaged. This would affect any compensation claim. |
| Fragile items should not touch each other or the sides of the outer carton. Pack the items with bubble wrap, polystyrene chips or crushed paper to a depth of at least 5 cm around each item. | Consider using reinforced corners if the contents of the parcel are heavy. |
| Write the sender's name and address clearly on the outer packaging so the item can be returned if undelivered. | |
